FINANCIAL FOCUS

By Matt Smith

In the investment world, there aren't many certainties, but here's one of them: prices will always go up and down. As an individual investor, you can't do anything about this volatility. But the way you respond to it could make a big difference in your long-term investment success.

Many investors think they can "beat" volatility by trying to time the market — in other words, by buying when prices are low and selling when prices are high. In theory, this is an excellent strategy, but in reality, it's pretty much impossible to follow — because no one can really predict, with any accuracy, market highs and lows. So instead of attempting to time the market, you're much better off by following a time-tested strategy known as systematic investing.

To systematically invest, you simply put the same amount of money into the same investments at regular intervals. To illustrate, you could put \$100, \$500, \$1000 or more into Investment X on the first of every month. To make it even easier on yourself, you could automatically transfer those dollars from your bank account directly into the investment you've chosen.

In all likelihood, your contribution will buy a different amount of shares of Investment X each month. For example, if Investment X sells for \$100 per share in January, a \$500 investment will buy five shares. In February, if the price has fallen to \$50 per share, your \$500 will buy 10 shares.

In other words, when you systematically invest, you'll automatically buy more shares when the price is low and fewer shares when the price is higher — and that's a great

way to cope with market volatility. But systematic investing also offers some other advantages, including the following:

- **Efficient share building** — The more shares you own of an investment, the bigger your cumulative gains whenever the price of that investment rises. Consequently, increasing your shares should be a prime objective — and systematic investing is one way of building your share ownership.
- **Investment discipline** — Most people realize the value of investing for their retirement and other long-term goals, but they often put it off each month and find other things to do with the money — and by then, there's often nothing left to invest. But by setting up a bank authorization to invest systematically each month, you'll "pay yourself first."
- **Lower cost of investing** — Through systematic investing, your cost per share likely will be lower than if you made sporadic lump sum investments. And by lowering the cost of investing, you will, in effect have the potential to boost your returns.

While systematic investing is typically a good way to fight the effects of volatility, it can't guarantee a profit or prevent a loss in declining markets. And keep in mind that you need to have the financial wherewithal to keep investing through up and down markets.

But if you have that ability, consider putting systematic investing to work for you. It may not be glitzy or glamorous, but it may work for you.

2010 Spring Recruiting Drive

The Cy-Fair Volunteer Fire Department will host a series of recruiting open houses at three of our fire stations this month to educate and inform those interested in joining one of the largest volunteer fire departments in the nation.

The volunteer fire service was started in this country by Ben Franklin. For more than 250 years the volunteer fire service has continued this tradition of “neighbors helping neighbors”. But over the past two decades the number of volunteer firefighters nationally has decreased by around 8%. The Cy-Fair Volunteer Fire Department has almost 400 volunteers today. The Cy-Fair VFD provides community based fire, EMS, and rescue services for 156 sq miles of Northwest Harris County using 12 fire stations. We provide all the necessary training and equipment needed. We have members from all walks of life including doctors, lawyers, bankers, realtors, career

firefighters, teachers, mechanics, welders, nurses, and stay at home parents. The only requirements are to have your high school diploma or GED, be 18 yrs old, and pass a drug and background check. The volunteers of the Cy-Fair Volunteer Fire Department save the tax payers of our area over \$28 million each year.

For anyone interested in volunteering there are a number of reasons to join:

- The satisfaction of helping others in your community especially when they are in need
- To gain experience and education in a wide variety of topics including - firefighting, emergency medical services, hazardous materials, fire codes, sprinkler systems and alarm systems
- Meet and work with others in your community, gain a sense of camaraderie with others by working together
Whatever your age or physical abilities there is something you can do at your local fire house to help out! While firefighters are needed, there are many other jobs where you could help:
- Drivers and pump operators are essential to all emergency operations (you can't get there without a driver!)
- Support personnel at the scene to move hoses, get equipment, etc.

FACTS YOU NEED TO KNOW ABOUT DROWNING

Drowning is the leading cause of unintentional injury-related death in children ages 1-4

DROWNING WILL AFFECT YOU OR SOMEONE YOU KNOW

Drowning is the 2nd leading cause of unintentional injury-related death ages 1-14.

For more information, check out our website at www.colinshope.org

DROWNING CAN STILL OCCUR EVEN IF YOU KNOW HOW TO SWIM

NO ONE is “drown proof” – no matter their level of swimming ability.

Falls, entrapments, and injuries lead to drowning regardless of swimming level.

A majority of people overestimate their own and their child's ability to swim, especially in a panic event.

DROWNING IS QUICK AND SILENT

Drowning occurs in as little as 2 minutes.

Irreversible brain damage occurs in as little as 4 minutes.

Most children are out of sight or missing for less than 5 minutes and usually in the presence of 1 or both parents.

Most children die who are submerged for as little as 6-10 minutes.

Children who drown do not **scream, splash, or struggle**. They silently slip beneath the water, even with adults & lifeguards present.

Can the Weather Affect My Child's Asthma?

Weather and Asthma

The effect of weather on asthma symptoms isn't fully understood, but clearly there is a link. Numerous studies have shown a variety of connections, such as increases in asthma-related emergency department visits when certain weather conditions are present. Some people find that their asthma symptoms get worse at specific times of year. For others, a severe storm or sudden weather change may trigger an attack.

Exposure to cold, dry air is a common asthma trigger and can quickly cause severe symptoms. People with exercise-induced asthma who participate in winter sports are especially susceptible. Dry, windy weather can stir up pollen and mold in the air, leading to problems for some people.

Hot, humid air also can trigger asthma symptoms, and wet weather encourages the growth of mold spores, another asthma trigger. In certain areas, heat and sunlight combine with pollutants to create ground-level ozone, which is also an asthma trigger.

Studies have shown that thunderstorms can trigger asthma attacks. One study showed that during thunderstorms, the daily number of emergency department visits for asthma increased by 15%. The study concluded that the problem was caused by the number of fungal spores in the air, which almost doubled. It wasn't rain, but the wind, that caused this increase. Changes in barometric pressure may also be an asthma trigger.

Avoiding Allergy Triggers

If you suspect weather is playing a role in your child's asthma, keep a diary of asthma symptoms and possible triggers and talk to your child's doctor. Once you know what kind of weather triggers asthma symptoms, you can take steps to protect your child:

- Watch the forecast for pollen and mold counts as well as other conditions (extreme cold or heat) that might affect your child's asthma.

- Limit your child's outdoor activities on peak trigger days.
- Make sure your child wears a scarf over his or her mouth and nose outside during very cold weather.
- Keep windows closed at night to keep pollens and molds out. If it's hot, use air conditioning, which cleans, cools, and dries the air.
- Keep your child indoors early in the morning (before 10 AM) when pollen is at its highest levels.
- Your child shouldn't mow the lawn or rake leaves, and should be kept away from freshly cut grass and leaf piles.
- Dry clothes in the dryer (hanging clothes or sheets to dry can allow mold or pollen to collect on them).
- Make sure your child always has rescue medication on hand.

Your child's written asthma action plan should list weather triggers and ways to manage them, including any seasonal increases in medication. A child whose asthma seems to be allergy-related may also need to see an allergist for medication or allergy shots.

Annual 12th Russian Children's Folk Festival 2010

Happy Families has been sponsoring orphaned children to participate in our Russian Children's Folk Festival since 1981! We plan to bring 15-20 children ages 6-12 from orphanages in the Kaliningrad region with their chaperones to Houston, TX in June 2010. The children will be staying with host families for 2 weeks.

School age children are one of the most deprived groups of Russian orphans. They have few chances for a bright future in Russia. The festival gives them a unique opportunity to see a different world outside of their orphanages.

These annual events have found much attention from the media, including coverage on ABC's Good Morning America and New York Times and many more. See details at www.happyfamilies.org.

What are the requirements to bring a child? Happy Families needs to raise about \$2,000 to bring each participant. This covers airfare, transportation in Russia, passports, visas, medical insurance, translation and coordination. We are asking for your support and participation in this project. Please contact us for additional information on how you can help.

Sincerely,

Svetlana Startz

YEAH YEAH, BACKUP BACKUP,

Nag Nag!

OK, my clients are used to hearing it, “backup backup backup.” I can say it often but it’s never too often. Let me put it another way, how much pain are you willing to endure? The hard drive in your computer WILL fail someday. So WHEN it does, how are you going to feel? School’s almost out for the summer. How will you feel when that final paper or report disappears right before you’re ready to submit it to the teacher or professor?

Maybe you’re a young family, and you have thousands of digital photos and videos recording everything your babies have done their first few years. Their first haircut, first birthday, first Christmas, the first time they walk, their FIRST WORDS! All in a pristine, digital format that is very easy to duplicate, yet all GONE, possibly never to be seen by anyone again.

You use something like Quicken or Microsoft Money and keep your banking records on your computer, or you own your own business and ALL your financial records are stored on your hard drive. It’s almost tax time and the information can’t be retrieved. You now have to spend days or weeks recreating your records as best you can (this happened to a client of mine.) The “computer ate my homework” won’t fly with the IRS.

So I’ll ask you again, how much pain are you willing to endure? You do have a few options to backing up your valuable data. One way is to do it yourself (I’ll go into more detail later.) Another way to preserve your memories is to pay someone else to do it. Yet a third way is probably the most common way, intentional or not – prayer. No plan, no system, just the hope that nothing goes wrong with their computer. Since I’m not aware of a Patron Saint of the PC, I’ll concentrate on the first two methods – you’re on your own for the third option.

Want to do it yourself? Purchase an inexpensive external hard drive and plug it into your computer’s USB port. You can pick up a 500GB (that’s gigabyte) external hard drive at Best Buy for around \$80, and maybe a terabyte drive (that’s 1,000 gigabytes) for \$100. If you like to shop around online you can probably find something even cheaper. Just about anything you buy will include backup

software. If you don’t like it, you can try downloading my favorite, SyncBack. Go to 2BrightSparks.com, click on “Downloads” and choose their freeware. Download SyncBack in whatever language you like and go at it.

(Continued on Page 15)

Yeah Yeah, Backup Backup - (Continued from Page 14)

Of course, if you're not inclined for any reason to do it yourself, you can always pay someone to do the above for you. Also, you can keep the "upfront" cost to a minimum by going with an online solution. Two advantages are you don't have to spend very much up front, and the other is that even in the event of burglary, fire, etc. you can buy a new computer and download all your backed up files. The two most well known services are Mozy and Carbonite, they cost about the same (\$55 a year.) Mac users also have me.com as an option (though it is a little more expensive.)

Now, not all hope is lost if your hard drive should fail. There are services available that will take your hard drive, have employees in "bunny suits" take it into a "clean room" (much cleaner than an operating room), disassemble it, remove the platters (the parts with the information) and rebuild it with matching parts in an attempt to extract the data. IF they are successful, plan on spending approximately \$2,000 to get the data back. If that's a lot of money to you, then look at doing it yourself or hire an expert to do it for you. It's not hard at all to do – but you need to do it. If you don't, you're going to remember how you were "nagged" and didn't do anything when you could have, and there will be a geek waiting for your phone call.
