## **GIRL SCOUTS OF SAN JACINTO COUNCIL COPPER CREEK MEADOWS COMMUNITY**

Summer has been a great time for Girl Scouts from Copper Creek Meadows Community, and for many of them it has included a session of Girl Scout Day, twilight or resident camp. For many Girl Scouts, camp is a time to learn new skills, and make new friends. Campers may have reached a new level in swimming, riding or sailing. Paddling a canoe for the first time, making a bullseye at the archery range, or hiking through the woods are all special times at camp. Where else would you learn all those crazy camp song and traditions?

Girl Scouts from our community and region have joined together this summer for two enjoyable movie events. We have also heard that the Girl Scout soccer program finished up a successful season, and look forward to playing again!

It won't be much longer before school is once again in session, and Girl Scout troops resume their regular meetings.

Please be on the lookout for information on Girl Scout Rally nights, when we recruit new leaders and form new troops.

Many thanks to ALL of our volunteers at every level- we can't have Girl Scout troops or a community without you!

Girl Scouting is open to all girls, ages 5 (must be in kindergarten), who through 18, who are willing to accept the Girl Scout Promise and Law.

### ***THE GIRL SCOUT PROMISE***

**On my honor I will try to serve God and my country  
To help people at all times  
And to live by the Girl Scout Law.**

### ***THE GIRL SCOUT LAW***

**I will do my best to be  
Honest and fair  
Friendly and helpful  
Considerate and caring  
Courageous and strong  
And responsible for what I say and do  
And to  
Respect myself and others  
Respect authority  
Use resources wisely  
Make the world a better place  
And  
Be a sister to every Girl Scout**

Girls may join at any level, and no previous Scouting experience is required. Don't forget that many of our most exciting experiences and special interest groups are available to older girls. Older girls whose busy schedules do not allow for involvement with a troop may participate as individually registered Girl Scouts.

Copper Creek Meadows serves girls in the residence areas for the elementary schools listed below, as well as the corresponding middle and high schools. Home schooled and private school students are always welcome. Our elementary schools are: Birkes, Fiest, Hairgrove, Horne, Kirk, Lee, Lieder, Lowery, Metcalf, Owens, Tipps, Wilson, St. Elizabeth Ann Seton, Texas Christian School, and Christian Life Center.

Please contact [coppercreekmeadowsgirlscouts@gmail.com](mailto:coppercreekmeadowsgirlscouts@gmail.com) for more information. You may also contact Girl Scouts of San Jacinto Council at 713-292-0300 ([www.gssjc.org](http://www.gssjc.org)).

## Dead spots in the lawn? Look for chinch bugs

Chinch bugs often appear in Texas lawns during hot, dry conditions. Usually damage starts in sunny locations or near driveway and sidewalk areas. Damage appears as irregular dead patches in the lawn surrounded by yellowing or dying grass. Chinch bug damage can be mistaken for other lawn problems like white grubs or fungal diseases, so confirmation of chinch bug activity is needed before choosing proper treatment.

So how do you tell if you have chinch bugs? The easiest way is to look for the insects. One way to look is to cut both ends out of a can, push it into the ground using a twisting motion and then fill the can with water for about 10 minutes and wait for any bugs to float to the top. Another way would be to get down on your hands and knees and part the grass to look for the insects. For both methods, samples should be taken in the damaged (yellowed grass), not dead, grass areas.

Chinch bugs are small (about 1/5 of an inch as adults; immatures are smaller). Adults are black with white wings containing triangular markings. Nymphs, or immatures, are yellowish or pinkish with a light colored band across their body. Nymphs do not have fully developed wings.

Treatment is usually a liquid or granular formulation. Liquid

formulations are often bottles that attach to the end of the garden hose or concentrates that you mix with water in a tank sprayer. Granular formulations are applied with push spreaders and need to be watered in after treatment.

Treatment should be applied to the area where damage is occurring and several feet out from the damaged area; the entire yard does not have to be treated. All label instructions should be read and followed before and during the treatment.

For more information or help with identification, contact Wizzie Brown, Texas AgriLife Extension Service Program Specialist at 512.854.9600.
